CALL FOR PAPERS

The emphasis of the conference will be devoted to all aspects of circuits and computers focusing on VLSI and Large Scale Systems. These may include new integrated circuits for VLSI applications and their effect on computer design; the computational algorithms and methods for large-scale circuits and systems; design automation and verification, logic simulation, fault analysis, layout and routing; VLSI design/testing and new tools to automate VLSI design and software impact on hardware design and testing; hardware/software applications to mini and micro computers; VLSI packaging; large scale computer and queueing networks; large scale transportation and communication networks; large scale dynamical systems; large scale system applications in other disciplines.

INSTRUCTIONS FOR AUTHORS

The conference will accept both regular and short papers. For regular papers, four copies each of a 35-word abstract and 300-500 words summary with figures are required. Submission of the full text is encouraged. For short papers, a 35-word abstract should be submitted. Please make sure that abstract and summaries are of sufficient detail to permit careful evaluation by referees. Please include office and/or home telephone numbers.

LOCATION

IEEE/ICCC '82 will be held in downtown New York at the New York Hilton at Rockefeller Center. A block of rooms has been set aside for conference attendees. Hotel reservations can be made by contacting the Hotel.
