

Technical Committee on **COMPUTATIONAL MEDICINE:** *Computers and Computing in Medicine*

The TC on Computational Medicine (COMP MED) is dedicated to advancing research and innovation in modern computer science and technology applied to medicine and health care services, and to fostering the development of computational medicine as a scientific discipline. Its scope encompasses all theoretical and applied aspects of using computers and computing to support medical research and practice and health care services. It strives to heighten awareness of the potential of modern computers and computing in these applications, and to pursue its realization.

The TC encourages interchange between scien-

tists/engineers and medical and health care professionals through its information, conference, publications, special interests, education, standards, liaison and student activities. It sponsors symposia, workshops, tutorials, and special sessions at conferences, and disseminates scientific/technical publications, including a newsletter.

There is no fee for membership or participation in any IEEE Computer Society Technical Committee. IEEE Computer Society membership is encouraged, but not required. The TC has Individual Members and Organizational Members in the professional, affiliate and student categories.

Member/Information Application for the **TECHNICAL COMMITTEE ON COMPUTATIONAL MEDICINE**
