The Lexidata System 3400 Display Processor and full line of interactive peripheral devices are designed specifically for OEMs and sophisticated end-users. The System 3400, rapidly becoming the leader, with over 1,000 units shipped to date, possesses the product characteristics required by this demanding customer group.

- **System 3400 performance** is truly outstanding. Only the System 3400 offers 1280x1024 resolution at 60Hz non-interlaced black-and-white and grayscale capability, or 880x704 resolution at 60Hz non-interlaced color. Our programmable lookup tables are the industry standard of performance. Double buffered memories or multiple lookup tables with bank switchable memories and processor features, such as pan/zoom and 4K WCS, are available.
- **System 3400 quality** satisfies the requirements of Fortune 500 companies, the leading CAD/CAM systems vendors and military and government contractors. We continue to focus on quality because we believe that quality and cost effectiveness are closely related.
- **System 3400 flexibility** ensures a configuration to meet the exact requirements of each customer. The System 3400 offers a complete range of OEM configurations, starting from $7,540, including monitor.
- **System 3400 software** provides a high-level language user-interface to execute graphics and imaging functions. The powerful subroutine library streamlines application software development and facilitates user interaction.
- **System 3400 cost effectiveness** enables even price-sensitive OEMs to configure a highly competitive product. You will be able to maximize your value-added contribution and optimize your overall system performance.
