FEATURE ARTICLES

13 Optical Scanning Digitizers
   George Nagy
Electronic eyes are everywhere, scrutinizing documents, blood slides, even pizza crusts. With this potpourri of applications, scanners may become as commonplace as today’s photographic camera.

26 A Look at Japan’s Development of Software Engineering Technology
   K. H. Kim
By 1990, Japan’s software engineering technology may rival that of the US and Europe. Its previous successes in computer hardware lend credibility to this national R&D goal.

38 Supercomputers = Colossal Computations + Enormous Expectations + Renowned Risk
   Neil R. Lincoln
Are supercomputer developers following the same old refrain or creating a new tune? The Cyber 205 project serves as a basis for this look at current and next-generation requirements.

48 Pattern Recognition in Software Engineering
   Robert W. DePree
Pattern recognition can be used to develop automated tools that support software engineering. Here, three applications offer solutions to coding redundancy, specifications, and progress monitoring.

55 The Invisible Compiler
   Granino A. Korn
In interactive simulation, users must generally wait for results from model changes. With this direct high-level language execution, the waiting is over.

63 Software Development Tools: A Profile
   Raymond C. Houghton, Jr.
What software development tools are available? What are their capabilities? Where can they be obtained? Now there are some answers for these questions.

72 Calculating the Maximum Mean Data Rate in Local Area Networks
   Bart W. Stuck
In spring 1981, a subcommittee was formed to study network access methods given the same workload. Results show that carrier sense collision detection offers the shortest delay under light load.

SPECIAL FEATURES

77 IEEE Design Automation Workshop Report
   Where is Computer-Aided Design Going? Donald Oestreicher

80 NSF Workshop Report
   Research Directions in Computer Engineering Herbert Freeman

84 The Open Channel
   Looking for a New Artificial Language Roger Skutt

DEPARTMENTS

8 Special Messages: 114 IEEE-CS Tables of Contents (A New Dept.)
Vice-President for Publications; 116 Classified Ads
Computer Editor-in-Chief 118 Calendar
86 New Products 119 Call for Papers
95 New Literature 126 Book Reviews: Software Engineering Economics
100 IC Announcements 128 Advertiser/Product Index
101 Microsystem Announcements 129 The Bookshelf
104 New Applications Reader Service Cards and Order Form, p. 128A.
106 Update: Compcon Spring 83 Computer Society Membership Application, p. 6.
