Advanced VLSI Design Automation

Ambitious long-range research projects and the time necessary to complete them are just two ways GTE Corporate Research Laboratories can assure your creative fulfillment. Become part of a group that is striving to be the best in:

- Silicon & System Compilers
- Computer Architecture and Languages
- Circuit Synthesis
- Testability Analysis and Design for Testability
- Algorithm Development and Analysis
- Automatic Test Generation
- Hardware Description Languages
- Support Programmer

Qualifications include MS/PhD in Electrical Engineering or Computer Science. Prior work experience with University Research Programs is preferred.

Bring your talents to America's Technology Highway - Route 128. Send your resume to Cynthia Farrar, GTE Laboratories, Inc., Dept. C7, 40 Sylvan Road, Waltham, MA 02254. An equal opportunity employer.
