The 1984 International Joint Alpine Symposium invites your submissions on all aspects of medical computer graphics and digital image communications. The Alpine Symposium is a joint forum of medical computer graphics scientists, engineers and physicists from universities, medical centers, industry and government, and practicing physicians in clinical computer tomography (CT), nuclear magnetic resonance (NMR) and other modes of clinical digital imaging.

The engineering program of this joint symposium will emphasize innovative research and applications, and will consist of contributions and invited papers, workshops and panels, covering the state of the art, work in progress, critical issues, and research initiatives. Papers are solicited on all aspects of digital medical imaging:

- Medical Computer Graphics Systems and Techniques
- Image Restoration, Enhancement, Filtering
- Image Analysis
- Medical Structure Modeling
- Prosthesis Planning and Manufacturing
- Surgical Planning/Control
- Image Archiving
- Image Communications
- Image Presentation Systems

Prospective authors and panelists should submit four copies of abstracts, 200-500 words, and include six key words that best characterize the paper, plus a short statement indicating its chief contribution or its biomedical impact. Also indicate the approximate length (long—10 pages maximum, 30 minutes; short—5 pages maximum, 15 minutes). Papers will be published by the Computer Society Press in the Conference Proceedings. Authors' kits for typing camera-ready manuscripts will accompany notification of acceptance.

TIMETABLE: ABSTRACT due October 1, 1983

NOTIFICATION and authors' kits mailed

November 1, 1983

CAMERA-READY MANUSCRIPTS due December 15, 1983

On behalf of the Conference Committee, we extend an invitation to all to share the excitement of digital medical imaging and its clinical application, along with the breathtaking panorama and hospitality of the Tirolean Alps.

Send submissions to either:

Michael L. Rhodes, Ph.D.
Co-Chairman 1984 Alpine Symposium
2730 Pacific Coast Highway

CALL FOR PAPERS

- Imaging Science
- New Imaging Instrumentation
- Computer Tomography
- Computer Graphics
- Organ Imaging
- Microscope Imaging
- Visual Psychophysics
- Signal Processing and Filtering
- Restoration and Enhancement
- Segmentation and Feature Extraction
- Image Analysis and Models
- Syntactic/Structural/Statistical Pattern Recognition
- Computer Vision/Scene Analysis
- Artificial Intelligence
- Computer-Aided Diagnosis
- Operational Systems and Prototypes
 - * Archiving and Communication
 - * Image Database Management
 - * Display Devices
 - * Image Analysis and Pattern Recognition
 - * Computer Graphics
- Education and Curricula
- Innovation Cycle: Concept to Product
- Digital Archiving Devices and Systems
- Communication Transmission Media
- Computer Architectures
- Computer Network Architectures
- Computer Languages
- Interface Problems and Protocols
- System Design Goals
- System Design Methodology
- System Performance Evaluation
- Standards and Quality Assurance
- Clinical Evaluation and Acceptance
- Technology Assessment
- Clinical and Research Applications

Papers will be published by the Computer Society Press in the Conference Proceedings. Papers will be limited to 30 minutes and 10 pages maximum.

CONFERENCE TIMETABLE

Four copies of 200-500 word abstracts due . . . January 15, 1984

Acceptance letters and authors' kits due . . . March 1, 1984

Complete camera-ready manuscripts due . . . April 15, 1984

PARTICIPATING SOCIETIES

- IEEE Computer Society:
 - Computer Graphics Technical Committee
 - Pattern Analysis and Machine Intelligence Technical Committee
- IEEE Acoustics, Speech and Signal Processing Society
