THEME FEATURES

11 Guest Editors' Introduction: New VLSI Tools
Daniel D. Gajski and Robert H. Kuhn

18 Masterimage Approach to VLSI Design
Richard L. Donze and George Sproynski
Masterimage takes the best features from customized design and gate array approaches, incorporating macro generation, automatic placement and wiring, and a delay calculator/optimizer.

26 Managing the Chip Design Database
Randy H. Katz
A design data management system bridges the gap between design tools and database systems, creating an integrated tool environment.

41 Palladio: An Exploratory Environment for Circuit Design
Harold Brown, Christopher Tong, and Gordon Foyster
The experimental Palladio environment recognizes the need to integrate tools and languages in an attempt to create a flexible design framework.

59 Automatic Data Path Synthesis
Donald E. Thomas, Charles Y. Hitchcock III, Thaddeus J. Kowalski, Jayanth V. Rajan, and Robert Walker
Techniques of knowledge-based systems are now being applied in VLSI synthesis and design. While still experimental, they promise more capable design aids.

74 MacPitts: An Approach to Silicon Compilation
Jay R. Southard
In spite of its somewhat unlikely sounding name, this compiler can effectively design custom ICs from an algorithmic specification of circuit behavior.

SPECIAL FEATURES

83 Meeting the Crisis in Computer Science
Stephen S. Yau, Robert W. Ritchie, Warren Semon, Joseph F. Traub, Andries van Dam, and Stanley Winkler
Participants in the Snowbird Conference assessed efforts of universities, industry, and professional societies to alleviate the crisis in computer science education and recommended further improvement.

89 1983 Annual Index

DEPARTMENTS

7 Letters to the Editor
8 Special Message: Farewell from the President
102 New Products
110 IC Announcements
111 Microsystem Announcements
112 New Applications
113 Update: Election Results, ITC, CS Awards
118 Classified Ads
128 Calendar
129 Call for Papers
133 Book Reviews: Software Reflected—The Socially Responsible Programming of Our Computers
135 The Bookshelf
136 Advertiser/Product Index
Reader Service Cards and Order Form p. 136A.
Computer Society Membership Application, p. 40.
