Now available
a reliable and selective guide
to the foundations of present-day
Artificial Intelligence.

Provides you with:
• a quick reference author/title list
• 210 reviews/full tables of contents
• comprehensive subject index/over 600 AI terms
• complete author index/more than 3500 names

This Consensus Bibliography® was developed through a sophisticated and objective evaluation process focusing on the root disciplines of AI, the publications of experts in these disciplines, and the publications most frequently and positively cited by these experts.

This first volume features seminal early works and many recent works. The second volume, available this spring, will emphasize recent literature, especially research reports.
