COMPUTER SECURITY

OPPORTUNITIES IN SANTA MONICA, CA (West L.A.)

SYSTEM DEVELOPMENT CORPORATION, a Burroughs Company, is seeking original thinkers and creative professionals with degrees in engineering, computer science, or mathematical logic to join their R&D team.

SDC’s R&D Centers are chartered to develop new technologies and products for the corporation. The R&D staff works closely with the academic and research communities in a variety of fields including computer networking, MLS computer security, AI, software technology, and distributed systems.

APPLICATIONS INCLUDE:

- R&D in and local wide area computer networks and related components, protocol design, specification and implementation, network configurations and architectures, system and host security, protocol certification, packet switching, and distributed systems.

EXPERIENCE DESIRED IN ONE OR MORE OF THE FOLLOWING:

- Knowledge of data communications, existing protocols, (TCP, IP, X.25), network topologies, protocol design, and contention control in the ARPANET or similar packet switched networks.
- Familiarity with the ISO model and related protocol structures.
- Hardware and software design and development of network devices.
- MLS computing systems, DBMS, and communication devices/systems.
- Knowledge of local area networks, commercial and common carrier store and forward and packet-switching networks and the protocols used.
- Methods for certifying or testing protocol implementations.
- Methods for mathematical verification of software correctness.
- Automated theorem proving.

SDC offers their professionals a flexible work environment, easy access to technical and computer resources on the job, outstanding benefits and a work environment where creativity and performance are rewarded.
