Computer Scientists and Electrical Engineers
(Master's or Ph.D. level)

The Morgan Stanley Computer Sciences Program is searching for aggressive, entrepreneurial candidates with superior academic records to join our MIS Department.

The Department

The Computer Sciences Program was designed to attract the best computer scientists and electrical engineers into our technology groups within MIS, and, by doing so, expose ourselves to new technological ideas. The MIS Department is currently implementing or investigating new technologies in:

- Fourth Generation Languages
- Fault Tolerant Systems
- Advanced Database Technologies
- Distributed Networking Architectures
- Expert Systems
- Office Automation

Project team members play a key role in devising strategies to exploit these and other technologies at Morgan Stanley, and to assist our venture capital and investment research groups in evaluating companies involved in new technologies.

The Technical Environment

Our computer network consists of six 3084 class machines, 5 STRATUS continuous processing systems, 270 microcomputers and 1000+ terminals, providing service to users around the world. In addition to our private network, we are connected to the major packet networks.

The Firm

Morgan Stanley, a privately held corporation, is one of Wall Street's leading investment banks. Our principal businesses include managing underwritings of new securities, offering financial and investment advice, and trading securities for client and firm accounts. Firm management has designated excellence in information technology as a major strategic initiative necessary to maintain our leadership in the financial community.

Selected candidates responding to this advertisement will be invited to New York City for a presentation by the MIS Department and a series of interviews. We require a resume and a cover letter which provides an organized presentation of your qualifications, achievements, and career interests. One of our selection criteria will include the quality of the presentation made in the cover letter. Send correspondence to:
