Computer Scientist
Software Information Systems

Argonne National Laboratory is a U.S. Dept. of Energy multidisciplinary research center. Its National Energy Software Center (NESC) serves as DOE's software exchange and information center.

As NESC Group Leader you will be leading the development and maintenance of information systems, automating the storage, retrieval and publishing of information resources. You'll be determining needs, costs and schedules for proposed projects, explaining capabilities, databases and forms, and preparing documentation while keeping abreast of the latest in hardware/software.

Requires M.S./Ph.D. comprehensive knowledge of Computer Science in application to information and DBM systems, architecture, operating systems, and assembly and higher language programming. Good oral and written communications skills important. Salary will be fully competitive.
