**TABLES OF CONTENTS**

**Computer Graphics and Applications**

Vol. 6, No. 2, Feb. 1986 (Monthly)
Nonmembers, $155/yr.; members, $22/yr.

Guest Editor's Introduction
- Parametric Spline Curves and Surfaces

**Articles**
- Manipulating Shape and Producing Geometric Continuity in Spline Curves
- Uniform Models and -Splines
- Rectangular -Splines
- Ray Tracing Free-Form Spline Surfaces

**Special Features**
- An Implementer's View of PHIGS
- The Generation of Color Sequences for Univariate and Bivariate Mapping

**Design & Test of Computers**

Vol. 3, No. 1, Feb. 1986 (Bimonthly)
Nonmembers, $110/yr.; members, $14/yr.

Guest Editor's Introduction
- Sampling Quality

**Features**
- WEAVER: A Knowledge-Based Routing Expert
- Magic's Circuit Extractor
- The CMU-CAM System
- An Automatic DFT System for the Silic Silicon Compiler
- Automatic Generation of Digital System Schematic Diagrams
- Hierarchical Analysis of IC Artwork with User-Defined Rules
- The VIVID Symbolic Design System: Current Overview and Future Directions

**IEEE Transactions on SOFTWARE ENGINEERING**

Vol. SE-12, No. 2, Feb. 1986 (Monthly)
Nonmembers, $160/yr.; members, $15/yr.

Guest Editors' Prologue
Special Issue on Software Design Methods

**Features**
- Data Structured Programming: Program Design Without Arrays and Pointers
- Object-Oriented Development
- An Overview of JSD
- Functional Programming, Formal Specification, and Rapid Prototyping
- A Rational Design Process: How and Why to Fake It
- A Recommended Practice for Describing Software Designs: IEEE Standards Project 1016
- An Empirical Study of Software Design Practices
- A Metaprogramming Method and its Economic Justification
- Constrained Expressions: Adding Analysis Capabilities to Design Methods for Concurrent Software Systems
- Salient Features of an Executable Specification Language and Its Environment
- Developing Interactive Information Systems with the User Software Engineering Methodology
- Process-Translatable Petri Nets for the Rapid Prototyping of Process Control Systems
- Real-Time Software Life Cycle with the Model System

**IEEE TRANSACTIONS ON COMPUTERS**

Nonmembers, $160/yr.; members $15/yr.

**Articles**
- Reasoning about Fault Diagnosis with LES
- The Mud System
- Declarative Knowledge Programming: Better than Procedural?
- Recognition of Polyhedra from Range Data
- A Knowledge-Based Robotic Assembly Cell
- Man-Machine Interfaces: Can They Guess What You Want?

**Special Features**
- Interview: Peter Hart Talks about Expert Systems
- Introduction to Expert Systems

**Selected Articles**
- Structured Design for Testability in Semiconductors
- Megacells
- A High-Level-Language Programmable Controller—Part I
- Heuristic Minimization of MVL Functions: A Direct Cover Approach
- Computer Vision: Representation of Uncertainty in Computer Vision Using Fuzzy Sets
