DIRECTOR - CITI

The Center for Information Technology Integration (CITI), is a new organization at The University of Michigan. The Director is one of the key positions reporting to the Vice Provost of Information Technology.

CITI was established to provide a major research and development arm for the University’s Information Technology Division (ITD), and to provide the critical link with industry that will enable the University to build the most advanced information technology environment in higher education. The envisioned multi-vendor environment will be based upon a network of thousands of high performance individual workstations, several mainframe computers and widely distributed servers with a variety of capabilities.

The Director of CITI provides supervision and leadership for a staff that is expected to grow to about 40 professional employees. The Director also manages a growing annual budget, expected to exceed $2 million. Other major responsibilities include: identity, contact and develop potential industrial supporters, provide overall technical direction for the cooperative ventures with industry, and work closely with other members of ITD senior management and with various academic deans to strategically plan and develop the desired information technology environment.

The successful candidate will be a leader who is articulate and highly effective in both written and oral communication with the academic, research and administrative components of the campus and who possesses creativity and vision for the future of information technology within higher education. Requirements include: a strong technical background, a strategic orientation, demonstrated large-scale system integration skills, an understanding of networking in heterogeneous computer environments, and a proven record in establishing and managing research and development activities. A Ph.D. in computer science or engineering and the qualifications for a tenured position are highly desirable.

Send applications, including resume, by October 15, 1986 to Virginia E. DeMerski, Ph.D., Assistant to the Vice Provost for Information Technology, 5077 Fleming Administrative Bldg., Ann Arbor, Michigan 48109.
