CALL FOR PAPERS

11th ACM Symposium on Operating Systems Principles

November 9–11, 1987
Wyndham Hotel
Austin, Texas

The field of operating systems now adjoins many other areas of computer science, some of which may provide new perspectives on our field. We solicit papers in both the central and border areas of the operating systems domain.

Some topics of interest include:

- Communication
- Database Systems
- Distributed Systems
- Language Issues
- Multiprocessor Systems
- Performance Evaluation
- Reliability
- Resource Management
- Security
- Supercomputers
- System Structuring
- Theoretical Issues

Papers should be no longer than 5000 words (about 20 double-spaced pages). The title of the paper and the author’s name and address should appear on a cover sheet accompanying the paper. The author should not be identified in the paper itself. Blind reviewing will be done by the program committee, assisted by outside referees.

Please send twelve copies of your paper to:

Prof. Alfred Spector
Department of Computer Science
Carnegie Mellon University
Pittsburgh, PA 15213

Authors of accepted papers will be expected to sign an ACM copyright release form. Proceedings will be distributed at the symposium and published as a special issue of Operating Systems Review, the SIGOPS quarterly. Papers of particular merit will appear in a special issue of the ACM Transactions on Computer Systems.

Program Committee

Özalp Babaoğlu, Cornell
Eric Cooper, CMU
David Gifford, MIT
Edward Lazowska, Univ. of Washington
Bruce Lindsay, IBM Almaden

John Ousterhout, Berkeley
Michael Schroeder, DEC SRC
Alfred Spector (Chairman), CMU
Guy Steele, Thinking Machines
Norihisa Suzuki, IBM Tokyo
