CALL FOR PAPERS
ACM-IEEE COMPUTER SOCIETY
1987 FALL JOINT COMPUTER CONFERENCE
EXPLORING THE KNOWLEDGE-BASED SOCIETY
FJCC '87 October 25-29, 1987 INFOMART—DALLAS, TEXAS

FJCC '87 is a professional conference targeted at all professionals concerned with computing in research, development, and applications. FJCC '87 will provide a forum where corporate decision makers and other leaders in the field can meet to discuss the new and expected direction in the computer industry and profession, not only to announce new discoveries, but also to examine the impact and influence of these latest innovations.

You are invited to submit:
- an original technical paper
- a survey paper
- a proposal for a panel/session discussion
- a proposal for a tutorial
- a proposal for a professional development seminar
- a proposal for a short workshop
- birds-of-a-feather session, poster presentation, etc.

Papers should be complete and include an abstract. Papers will be refereed and accepted papers will be published in a proceedings available at the opening of the conference.

Proposals should state the subject and purpose, and indicate expected participants. Papers, panels, and tutorials will be selected on the basis of technical quality, relevance of the subject matter, and value to the conference participants. Participants need not be members of the ASSOCIATION FOR COMPUTING MACHINERY or THE COMPUTER SOCIETY OF THE IEEE.

DATES:
March 15, 1987 Papers and proposals due.
Five copies of a paper or proposal are required. Send papers and panel session proposals to Dr. Stephen A. Szygenda. Send proposals for tutorials, workshops, and seminars to Toni Shetler.

May 15, 1987 Notification of acceptance sent.
Authors will be sent special paper instructions for preparing camera-ready copy, and a copyright release form which must be signed and returned with the camera-ready copy.

July 1, 1987 Camera-ready copy due.

FOR EXHIBITORS
FJCC '87 considers EXHIBITS to be an important part of the total experience to be gained at the 1987 Fall Joint Computer Conference. Discriminating exhibitors will discover an excellent opportunity to display their products and interact with leaders of the computer industry and computer profession during the most exciting and innovative conference of the year.
