CALLS FOR IEEE CS PUBLICATIONS

IEEE Annals of the History of Computing is planning a January-March 2007 special issue on the computer communications services and technologies that existed before the development of the Internet. Annals seeks papers on bulletin boards, dial-up servers, and communications packages on time-share systems; store and forward networks, pre-OSI communications protocols, Bitnet, Cset, Telnet, Prodigy, Fidonet, CompuServe, and other networks; early use of Listserv and similar protocols; and any technology providing a service that has since been replaced by software running on the Internet.

Interested authors should contact Annals Editor in Chief David Alan Grier, at grier@gwu.edu. Abstracts are due by 1 September. To view the complete call for papers, visit www.computer.org/software/edcal.htm.

IEEE Software magazine plans a July/August 2006 special issue on software verification and validation techniques. Software seeks papers on topics that include the automation of software testing, experiences in testing process improvement, testing metrics, and best practices for testing in specific domains.

Submission Instructions

The Call and Calendar section lists conferences, symposia, and workshops that the IEEE Computer Society sponsors or cooperates in presenting. Complete instructions for submitting conference or call listings are available at www.computer.org/conferences/submission.htm.

A more complete listing of upcoming computer-related conferences is available at www.computer.org/conferences/.

CALL AND CALENDAR

JULY 2005

18-19 July: WMCS 2005: 2nd IEEE Int'l. Workshop on Mobile Commerce & Services (with CEC 2005), Munich. www.mobile.ifi.lmu.de/Conferences/wmcs05/

24-27 July: HPDC-14, 14th IEEE Int'l Symp. on High-Performance Distributed Computing, Research Triangle Park, N.C. www.caip.rutgers.edu/hpdc2005/

Call and Calendar

AUGUST 2005

14-16 Aug: Hot Chips 17, Symp. on High-Performance Chips, Palo Alto, Calif. www.hotchips.org/

SEPTEMBER 2005

15-16 Sept: AVSS 2005, Conf. on Advanced Video & Signal-Based Surveillance, Como, Italy. www-dsp.elet.polimi.it/avss2005/

17-21 Sept: PACT 2005, 14th Int’l Conf. on Parallel Architectures & Compilation Techniques, St. Louis. www.pactconf.org/pact05/

OCTOBER 2005

NOVEMBER 2005

26-30 Nov: ICDM 2005, 5th IEEE Int’l Conf. on Data Mining, New Orleans. www.cacs.louisiana.edu/~icdm05/

DECEMBER 2005

HASE 2005: 9th IEEE International Symposium on High-Assurance Systems Engineering

The annual IEEE High-Assurance Systems Engineering Symposium brings together experts from academia and industry to discuss current issues in service-critical, high-assurance systems. These types of applications include complex vehicular systems, military command and control centers, nuclear reactors, telecommunications networks, and critical e-commerce applications.

HASE 2005 will take place from 12-14 October in Heidelberg, Germany. Conference papers are expected to address topics that include high-assurance system and software designs, real-time systems and services, and model-based assurance evaluations. Highlighted events at HASE 2005 include panel discussions, demonstrations, focused workshops, and case study presentations.

For further information on HASE 2005, including venue and program details, visit http://hase.informatik.tu-darmstadt.de/.
