From its founding in 2005, the IEEE International Symposium on Service-Oriented System Engineering (SOSE) has become established as a leading international symposium devoted to state-of-the-art research (both academic and industrial) into the engineering of service-oriented systems such as cloud computing and web services.

Following the success of SOSE 2013, attended by over 200 delegates in the heart of Silicon Valley, we are pleased to announce that SOSE 2014 will be held on the 7th - 11th April 2014, in Oxford, UK. The symposium will once again be co-located with a number of high-quality IEEE conferences and workshops, and will also continue our highly-successful industrial program that attracts presentations from top-level executives in some of the world’s leading companies.

### General Chairs

- Emese Bari
  - Ebay, USA
- David Duce
  - Oxford Brookes, UK
- Huaimin Wang
  - NUDT, China

### PC Chairs

- Marek Reformat
  - Univ. Alberta, Canada
- Paul Townend
  - Univ. Leeds, UK
- Jin Zhi
  - Peking Univ., China

### Topics include

- Service-oriented engineering for Big Data
- Service-oriented engineering for Cloud
- Service Dependability and QoS
- Cyber-Physical systems
- Service testing and lifecycle models
- Industrial case studies
- Survey papers
- And much more (please see website)

### Publication

All accepted papers will be submitted for inclusion in the symposium proceedings, published by the IEEE Computer Society Press, and included in the IEEE Digital Library. We plan to publish a special journal issue for extended and revised versions of selected best papers presented at the symposium. One paper will win the SOSE 2014 Best Paper Award.
