Explore These Related Resources on the Internet of Things

Build Your Knowledge

**IEEE Internet Computing**
Insightful columns and peer-reviewed feature articles on all aspects of Internet computing, from programming and standards to security and networking, *IEEE Internet Computing* is the top choice for industry and academic readers.

**Technical Committee on Computer Communications (TCCC)**
Focusing on software and algorithmic aspects of computing paradigms fostered by open communication networks, TCCC members exchange ideas with other researchers, developers, academics, and students in this fast-changing field.

**40th IEEE Local Computer Networks Conference (LCN), 26–29 October 2015, Clearwater Beach, FL, USA**
The premier conference on theoretical and practical aspects of computer networking—from high-speed networks and the global Internet to specialized sensor networks—LCN is a highly interactive event promoting interchange of ideas and results among researchers, users, and product developers.

**IEEE Pervasive Computing**
Designed for researchers, practitioners, and educators, *IEEE Pervasive Computing* explores the role of computing in the physical world as characterized by visions such as the Internet of Things and ubiquitous computing.
