
16th International Symposium on Fault-Tolerant Computing: July 1-3, 1986, Vienna, Austria. Submit six copies of abstracts (150 words maximum) that include five keywords by October 25, 1985, to FTCS 16, Interconvention Hofburg, PO Box 80, A-1107 Vienna, Austria; phone (43) (222) 52-02-93.

IFIP Congress 86, 10th World Computer Congress: September 1-5, 1986, Dublin, Ireland. Papers are sought on design of components, applications, design of systems, and informatics in a developing world. Submit them by November 1, 1985, to IFIP Congress 86, 44 Northumberland Rd., Dublin 4, Ireland.

1986 International Symposium on Multiple-Valued Logic: May 27-29, 1986, Virginia Polytechnic Institute and State University, Blacksburg, Virginia. Original research, survey or tutorial papers on any subject in the area of multiple-valued logic are sought. Submit four (4) typed, double-spaced copies of the complete paper, not exceeding 20 pages, that include a 50- to 100-word abstract by November 1, 1985, to D.M. Miller, Computer Science Department, University of Victoria, PO Box 1700, Victoria, B.C., Canada V8W 2Y2; (604) 721-7220.

23rd ACM/IEEE Design Automation Conference: June 29-July 2, 1986, Las Vegas, Nevada. Authors are invited to submit original technical papers of recent and novel research, development or product developments in all areas of design automation. Submit five (5) copies of the complete paper, not exceeding 5000 words, that include a 100-word abstract by February 14, 1986, to Donald E. Thomas, IBM, Thomas J. Watson Research Center, PO Box 218, Yorktown Heights, NY 10598.

Call for Papers

JOIN THE HUGHES TEAM OF PROFESSIONALS IN OUR RAPIDLY GROWING RADAR DESIGN AUTOMATION LAB LOCATED NEAR LOS ANGELES INTERNATIONAL AIRPORT. HELP US BUILD A STATE-OF-THE-ART CAD SYSTEM FOR THE DESIGN AND TEST OF PCB, LSI AND VLSI CIRCUITS. THE FOLLOWING CHALLENGING AND REWARDING POSITIONS ARE CURRENTLY AVAILABLE:

LOGIC, CIRCUIT SIMULATION ENGINEER — Requires experience in circuit simulation (SLICM or SPICE), Logic and Fault simulation (TEGAS), Higher Level Behavioral Simulation, Fault/Circuit modeling and timing verification.

IC/PWB LAYOUT ENGINEERS — Will be responsible for enhancing our in-house CAD systems for placement and routing. Should have experience in the use of editors for IC and/or PCB layouts. Experience with maze and channel algorithms helpful.

TEST GENERATION SOFTWARE ENGINEER — Responsible for software engineering structured design, generation or requirements, design specs and databases. Requires experience in CAD/CAM, automatic test pattern generation, fault modeling and simulation, and logic design.

CAD S/W ENGINEERS — Will participate in the development of advanced CAD/CAM software system. Must be capable of interfacing with a relational database management system using graphic routing, modeling data for CAD/CAM applications and developing database interface software.

Our multi-million dollar CAE/CAD Facility features multiple VAX's, DEC-20's, Daisy, Mentor, CAE, Valid, and Calma Systems.

We offer competitive salaries and outstanding benefits.

You are invited to call Abe Ansari, Manager Engineering Department, collect at (213) 647-9697 or (714) 633-0822 (after 7:30 P.M.) for more information. Or send your resume to: Ed Smith, Hughes Aircraft Company, Radar Systems Group, Dept. CTDI-8, R8/4400, P.O. Box 92426, Los Angeles, CA 90009. Proof of U.S. Citizenship Required. Equal Opportunity Employer.
