Quik-Change™ Kits in SIGMA™ Make It Possible

Now there's a dedicated handler that can be re-dedicated to suit your needs.

"Quik-Change™ Kits", costing only a small fraction of the price of a replacement handler, will re dedicate SIGMA™ to DIP, to LCC, to PLCC, or back in less than 20 minutes. Changeover is easy and straightforward. Everything snaps into place. No adjustments or alignments are necessary.

Whatever your test handling needs, SIGMA™ has a built-in solution to your problems because we've taken the time to learn them. We have:

- A solution to obsolescence
- A solution to down time
- A solution to cost effectiveness
- A solution to the future

Now, isn't it time you learned more about SIGMA™?
