

E.Ted Grinthal is in charge of software quality assurance in the computer-aided design and test laboratory at AT&T Bell Laboratories in Murray Hill, New Jersey. He has been involved in the design, characterization, and reliability of discrete devices as well as the design, test generation, and testing of ICs. Since moving into CAD, he has worked in simulation, layout, and software QA.

Grinthal holds a BEE from New York University, an MSE from University of Pennsylvania, and a PhD from California Institute of Technology—all in electrical engineering. His address is AT&T Bell Labs, 600 Mountain Ave., Murray Hill, NJ 07974.

46 papers explore new computer-aided design and test tools that are continually being developed to cope with the ever increasing problems of VLSI complexity. 616 pp.
