Acknowledges Its 2015 Reviewers and Guest Editors

The articles appearing in *IT Professional* result from the hard work of many people besides the authors, including reviewers and guest editors. The crucial peer review process helps maintain the magazine’s quality. We deeply appreciate the efforts of our reviewers who reviewed the many articles submitted to *IT Pro* last year and offered valuable suggestions to authors for improvement. We also acknowledge the contributions of our 2015 guest editors who shaped and compiled our themes issues. Those who would like to serve as reviewers for *IT Professional* are welcome to contact the editor in chief, San Murugesan, at itpro@computer.org.

—IT Pro Editor in Chief
