The Unbeatable Package

IEEE Micro — an authoritative forum for the practicing hardware and software engineer. Covers design and applications problems from original statement through alternative approaches, design concepts, engineering theory, algorithms, choice of hardware, circuit design, and software.

COMPUTER — the readable professional journal that covers the spectrum of computer system design and application. Comes automatically with membership in the Computer Society.

Combined trial subscriptions to both magazines are available for as little as $18 if you act promptly. See application on facing page.

In coming issues of IEEE Micro:
- application features — aerospace, biomedicine, communications, consumer electronics, controls, education, measurement and instrumentation, programmable machine tools, robotics, signal processing
- microcomputer hardware — chips, boards, buses, systems
- microcomputer software — signal processing algorithms, languages, application software
- tutorials — computer science, engineering theory, algorithms, interfacing techniques, system organization, high-level languages
- and many other exciting topics

In coming issues of COMPUTER:
- local computer networks
- office information systems
- the Ada language
- language-directed architecture
