This new microsystem was created by a multidisciplinary team of hardware and software architects directed by William Lattin and, in the latter stages of the project, Jean-Claude Cornet.

We have evolved in one decade from the simplicity of the 4004 to the complexity of the iAPX 432. The progress has been enormous and the pace of innovation shows no sign of slowing. It seems likely, then, that we can look forward to a second decade every bit as exciting as the first.

Bibliography

Robert N. Noyce is cofounder and vice-chairman of the board of directors of Intel Corporation, Santa Clara, California. He previously served as president and chairman of the company. He was also cofounder of Fairchild Semiconductor Corporation in 1957 and was vice-president of Fairchild Camera and Instrument Company in 1968 when he left to start Intel.

Noyce has received numerous awards for his contributions to electronics and holds 16 patents for semiconductor devices, methods, and structures.

Noyce received a BA (Phi Beta Kappa) from Grinnell College in 1949 and a PhD in physical electronics from Massachusetts Institute of Technology in 1953. He is a Fellow of the IEEE, a member of the National Academy of Science, the National Academy of Engineering, and the American Academy of Arts and Sciences. In 1978 he received the IEEE Medal of Honor and, in 1979, the National Medal of Science and the I.E.E. Faraday Medal.

Marcian E. Hoff, Jr., is manager of applications research at Intel Corporation, which he joined in 1968. He has worked on memory circuits, MOS and bipolar microcomputer architectures, microcomputer support software, circuit modeling programs, and techniques for redundancy and very large scale integration. Since 1974 he has been active in Intel's telecommunications product development.

Hoff received the BEE degree from Rensselaer Polytechnic Institute in 1958, and the MS and PhD degrees from Stanford University in 1959 and 1962. He remained at Stanford for six years as a research associate, working on adaptive systems. The inventor or co-inventor on 10 US patents, Hoff is a member of the IEEE, Eta Kappa Nu, Tau Beta Pi, and Sigma Xi. He is also a recipient of the IEEE's Cleo Brunetti Award and the Franklin Institute's Stuart Ballantine Medal.
