Tutorial: Microcomputer System Software and Languages

Belton E. Allen

Provides overviews of microprocessor software development facilities and tools, microcomputer programming languages, automated language processor development, microprocessor operating systems, microprocessor system testing, and 16-bit microprocessor software support.

NM, $14.00 M, $10.50

Tutorial: Microcomputer Programming and Software Support

Imsong Lee

Tutorial surveys microcomputer applications, programming practices, software tools, programming languages and cost/performance trade-offs in microcomputer programming. Seventeen papers.

NM, $12.00 M, $9.00

VLSI: The Coming Revolution in Applications and Design

Rex Rice

Emphasizes economic considerations. Traces VLSI design through complete processes from systems design through tested computer. Hazards, alternatives and economic considerations covered.

NM, $22.00 M, $16.50
