

An outstanding collection of papers on the topics of migration and geophysical inverse techniques, pattern recognition, and power spectrum analysis—as well as multiple sensor data analysis, digital filtering and other information to meet the growing demand for information on computer-aided seismic analysis and discrimination. This second international symposium, held four years after the first, was co-sponsored by four IEEE societies. 158 pp.

Order #370

**PROCEEDINGS OF THE 2nd INTERNATIONAL SYMPOSIUM ON COMPUTER AIDED SEISMIC ANALYSIS AND DISCRIMINATION**

August 18-21, 1981

Members—\$12.00

Nonmembers—\$16.00

Use order form on p. 95.

This forum for information exchange on the implementation of software standards assembled a collection of papers, panels and discussion groups that directly assessed the issues of software standards. Sessions covered general approaches, the need for standards, quantitative methods, principles, conclusions and recommendations. 151 pp.

Order #353

**SOFTWARE ENGINEERING STANDARDS Applications Workshop**

August 18-20, 1981

Members—\$12.00

Nonmembers—\$16.00

**Wayne M. Loucks** is a research associate in the Department of Electrical Engineering, University of Toronto, Ontario, Canada. He is currently involved in the development of a local-area computer network. His main interests are computer architecture, multiprocessors, microprocessor applications, and computer communications.

A member of the IEEE and the ACM, Loucks received the BSc in 1975 from the University of Waterloo, Ontario, Canada, and the MSc and PhD from the University of Toronto in 1977 and 1980, respectively.

Loucks' address is Dept. of Electrical Engineering, University of Toronto, 35 St. George St., Toronto, Ontario M5S 1A4.

**Martin Snelgrove** is a lecturer at the University of Toronto. His research interests include electronic circuits and filters, CAD for circuits, multiprocessor systems, and VLSI.

He obtained BSc and MSc degrees from the University of Toronto in 1975 and 1977, respectively, and is currently completing a doctorate. He is a member of the IEEE and of the Association of Professional Engineers of Ontario.

**Safwat G. Zaky** is an associate professor in the Department of Electrical Engineering, University of Toronto. His research interests are in computer architecture, hardware, and communications. Prior to joining the University of Toronto, he was with Bell Northern Research, Bramalea, Ontario, Canada, where he worked on applications of electro- and magneto-optics in telephone switching.

Zaky holds a BSc in electrical engineering and a BSc in mathematics, both from Cairo University. He obtained his MSc and PhD degrees in electrical engineering from the University of Toronto. He is a member of the IEEE and of the Association of Professional Engineers of Ontario.
