

WANT TO WRITE FOR IEEE MICRO?

We are seeking original works relating to the design, performance, or application of microprocessors and microcomputers. Tutorial and survey articles will also be considered for publication. Topics of interest include

architecture
data acquisition
process control
communications
algorithms
robotics
personal computing

digital signal processing
microprocessor support hardware
software design
applications software
microprocessor development
systems
artificial intelligence

We are also interested in article-length reviews of new books on microprocessor-related topics.

For information and author guides contact

Dr. Richard C. Jaeger
Editor-in-Chief, *IEEE Micro*
