HONORING THE IEEE CENTENNIAL

15 Derek de Solla Price and the Antikythera Mechanism: An Appreciation
   L. Robert Morris

22 A History of Calculating Machines
   Derek de Solla Price
   Man's attempts to devise aids to calculation are almost as old as man himself.

ARTICLES

54 Motorola's MC68HC11: Definition and Design of a VLSI Microprocessor
   James M. Sibigtroth
   The MC68HC11 demonstrates Motorola's conviction that 8-bit devices still address a significant market: its design proves that 8-bit technology still offers ample technical challenge and opportunity for creativity.

66 The Basic Fault-tolerant System
   Ernst J. Schmitter and Peter Baues
   Designed for network applications, this system achieves fault tolerance by exploiting redundancies inherent in standard components.

DEPARTMENTS

3 From the Editors-in-Chief
11 Letters to the Editor
11 About the Cover
12 Microview: A national policy to maintain United States technological leadership
75 Micronews: 32-bit micros; database computer
80 Microlaw: What is the "function" of an operating system?
82 Microstandards: Status—P854 radix-independent floating-point arithmetic; P694 microprocessor assembly language
84 Microreview: The HP 150
86 New Products
89 Product Summary
91 Access
96 Advertiser/Product Index
99 Professional Calendar

Reader Service Cards, p. 97.
