References

Nahum B. Goldstein is an assistant professor of engineering at Harvey Mudd College, Claremont, California. His research interests include microprocessor applications, local-area networks, and process automation. He received the mechanical engineer degree from Universidad Simon Bolivar, Caracas, Venezuela, in 1974, and the PhD degree in control sciences from the University of Minnesota in 1980. He is a member of the IEEE Control Systems Society.

Questions about this article can be directed to Goldstein at the Engineering Clinic Office, Harvey Mudd College, Claremont, CA 91711.

Neal K. Riedel is with M/A-COM Linkabit, Inc., in San Diego, where he is working on digital telephone cross-connect systems. He received his BS in engineering from Harvey Mudd College in May of 1985. While attending Harvey Mudd, he served as leader of the ESL, Inc., Engineering Clinic team which developed the TMS32010 FFT system described in this article.

David A. McAninch is currently working on his master of engineering degree at Harvey Mudd College. His interests include analog electronics research and design. He received his BS in engineering from Harvey Mudd in May of 1985.

Cameron Fisher is an engineering senior at Harvey Mudd College. His interests include digital and microprocessor system design.
