Putting the microprocessor puzzle together isn't much fun when some of the pieces are missing. That's why readers turn to IEEE Micro for needed technical information. They know its articles are written by manufacturers, resellers, and consultants—people just like themselves who want to solve technology's puzzles.

If you have a piece of the microprocessor/microcomputer puzzle our readers may need, we invite you to submit article ideas to IEEE Micro. We are especially interested in articles to include in the upcoming special theme issues on operating systems and multiprocessing. Articles on other micro-oriented subjects are always welcome.

We urge you to share with your colleagues the one piece of information they may need to complete their puzzle.

**AUGUST 1986**

**Operating Systems**

Manuscript due date: March 15, 1986

**OCTOBER 1986**

**Multiprocessing**

Manuscript due date: June 15, 1986

Send all submissions to:
