Endo, Inc.

People and their ideas are coming closer together through advanced telecommunications.

Thanks to optical fibers, digital switching and satellite relay, electronically produced and processed information can travel to almost any spot on earth instantaneously.

Oki Electric—a total electronics manufacturer—has pioneered information and communication technologies for over 100 years.

Oki has made giant strides in R&D of fiber optics, digital electronics and VLSI technology to serve the growing need for increased efficiency and productivity in the Information Age.

Oki supplies telecommunications equipment and systems, information processing systems and terminals, office automation systems and electronic devices to public and private sectors around the globe.

It takes big ideas to make the world smaller.

Helping the world communicate better
