Acknowledgments
We extend our special gratitude to Ken Sakamura, Fukuya Ishino, and Yasuaki Hamada for their helpful advice throughout the entire CTRON research project.

References

Toshikazu Ohkubo is a senior research engineer in the Switching Control Systems Section, Switching Technology Department, at NTT Telecommunication Networks Laboratories, where he conducts research into operating system architectures. Since joining the company in 1971, he has been engaged in developmental research on Dendenkosha (the former Japanese name of NTT) Information Processing System (DIPS) operating systems and communication control systems.

Ohkubo received his BE degree in 1969 and his ME degree in 1971 at Waseda University in Tokyo. He is a member of the Institute of Electronics, Information and Communication Engineers of Japan (IEICE), of the Information Processing Society of Japan (IPS), and of the Computer Society of the IEEE.

Tetsuo Wasano is a senior research engineer in the Strategy Group at NTT Communications and Information Processing Laboratories. He is presently engaged in computer architecture strategy planning. Since joining the laboratory in 1970, he has been engaged in developmental research on DIPS operating systems and in research into artificial intelligence.

Wasano graduated from Tokyo University in 1970 with a BE degree. He is a member of the IEICE and of the IPS.

Ichizo Kogiku is a research engineer in the Switching Control Systems Section, Switching Technology Department at NTT Telecommunication Networks Laboratories. There, he is conducting research on operating system architectures. Previously, he had been engaged in developmental research on DIPS operating systems and relational database retrieval systems at NTT Communications and Information Processing Laboratories.

Kogiku received his BS and MS degrees in mathematics from Tohoku University in 1975 and 1977. He is a member of the IEICE, of the IPS, and of the IEEE.

Readers may write to Toshikazu Ohkubo at the Switching Control Systems Section, Switching Technology Department, NTT Telecommunication Networks Laboratories, 3-9-11 Midori-cho, Musashino, Tokyo 180, Japan.
