Features

6 Guest Editors’ Introduction: Special Series on Harsh Chips
   Augusto Vega, Alper Buyuktosunoglu, and Pradip Bose

8 Timing Verification of Fault-Tolerant Chips for Safety-Critical Applications in Harsh Environments
   Mladen Slijepcevic, Leonidas Kosmidis, Jaume Abella, Eduardo Quinones, and Francisco J. Cazorla

20 R3TOS-Based Autonomous Fault-Tolerant Systems
   Xabier Ithurbe, Ali Ebrahim, Khaled Benkrid, Chuan Hong, Taybrud Arslan, Jon Perez, Didier Keymeulen, and Marco D. Santambrogio

31 An Augmented Reality Processor with a Congestion-Aware Network-on-Chip Scheduler
   Gyeonghoon Kim, Donghyun Kim, Songwook Park, Youchang Kim, Kyubo Lee, Injoon Hong, Kyeongyueol Bong, and Hoi-Jun Yoo

42 Embedded SRAM and Cortex-M0 Core Using a 60-nm Crystalline Oxide Semiconductor

54 A Flexible, Self-Tuning, Fault-Tolerant Functional Unit Array Processor
   Jun Yao, Yasubiko Nakashima, Mitsutoshi Saito, Yohei Hazama, and Ryosuke Yamanaka

64 FT-Matrix: A Coordination-Aware Architecture for Signal Processing
   Shuming Chen, Yaobua Wang, Sheng Liu, Jianghua Wan, Haiyan Chen, Hengzhu Liu, Kai Zhang, Xiangyuan Liu, and Xi Ning

74 Silicon Odometers: Compact In Situ Aging Sensors for Robust System Design
   Xiaofei Wang, John Keane, Tony Tae-Hyoung Kim, Pulkit Jain, Qianying Tang, and Chris H. Kim

86 Reliable Computing with Ultra-Reduced Instruction Set Coprocessors
   Dan Wang, Aravindkumar Rajendiran, Sundaram Ananthanarayanan, Hiren Patel, Mahesh V. Tripunitara, and Siddharth Garg

Departments

4 From the Editor in Chief
   Harsh Chips, but a Grateful Good-Bye

95 Awards
   2014 International Symposium on Computer Architecture Influential Paper Award; 2014 Maurice Wilkes Award Given to Ravi Rajwar

98 Micro Law
   Computer Society Information, p. 3
   Advertising/Product Index, p. 73
