Thanks to IEEE MultiMedia’s Reviewers

Many colleagues have assisted the IEEE MultiMedia Editorial Board in the article review and selection process. By offering their time and talent, reviewers provide a valuable service to this publication. The Editor in Chief realizes that this type of professional service, while absolutely necessary, doesn’t receive much recognition. Whereas reviewers’ efforts on individual articles are performed under the cover of confidentiality, I thank them all here publicly for their efforts during 2003.

—Forouzan Golshani, Editor in Chief
