Upcoming Events

3rd Int’l Workshop Future Multimedia Networking
17–18 June 2010
Krakow, Poland

With IEEE technical sponsorship in collaboration with ACM and sponsored by IET and the British Computer Society, the objective of the FMN 2010 workshop is to discuss state-of-the-art research and developing activities contributing to aspects of multimedia systems, content networking, and autonomous communication.

Workshop on Analysis and Evaluation of Large-Scale Multimedia Collections
22 August 2010
Istanbul

A one-day event to be held in conjunction with the 20th Int’l Conference on Pattern Recognition (ICPR 2010), this workshop aims to bring together researchers and industrial practitioners interested in large-scale multimedia retrieval and mining. The workshop will provide a venue for the participants to explore how advanced multimedia analysis techniques can be leveraged to address the challenges in large-scale data collections. The workshop will provide a forum to consolidate key factors related to research on very-large-scale multimedia datasets such as the construction of such datasets, the creation of ground truths, and extension of such resources in terms of features, algorithms, and tools.

16th Int’l Conf. Distributed Multimedia Systems
14–16 October 2010
Oak Brook, Illinois, US

The DMS international conference series includes a wide spectrum of paper presentations, technical discussions, and demonstrations in the fields of distributed multimedia computing. The theme for DMS 2010 is globalization and personalization. The conference is organized by Knowledge Systems Institute, US; University of Florence, Italy; and University of Leeds, UK.

12th Int’l Conf. Multimodal Interfaces and 7th Workshop Machine Learning for Multimodal Interaction
8–12 November 2010
Beijing

The primary aim of ICMI-MLMI 2010 is to further scientific research within the broad field of multimodal interaction, methods, and systems, focusing on major trends and challenges, and working toward identifying a roadmap for future research and commercial success. The conference will feature keynote speakers, technical paper presentations, poster sessions, a doctoral consortium, and demonstrations of state-of-the-art multimodal systems and concepts. The conference will be followed by workshops.

Call for Participation

Multimedia Grand Challenge

ACM Multimedia
25–29 October 2010
Firenze, Italy

What problems do Google, Yahoo!, HP, Radvision, CeWe, Nokia, and other companies see driving the future of multimedia? The Multimedia Grand Challenge consists of a set of problems outlined by these industry leaders and designed to engage the multimedia research community in answering relevant, interesting, and challenging questions about the multimedia industry’s future directions. Researchers are encouraged to consider the challenges and submit contributions to the ACM Multimedia 2010 Grand Challenge track. The top submissions will be presented in a special event during the ACM Multimedia 2010 conference (see http://www.acmmm10.org). On the basis of these oral presentations, winners will be selected for Grand Challenge awards worth $1,500. The submission deadline is 1 August 2010.

For details on the challenges and submission information, visit http://www.multimediagrandchallenge.com/.
