Source code control is only one step in software configuration management.

Softool’s Change and Configuration Control (CCC™) takes you all the way to full configuration control!

CCC automates: Management of changes and configurations, control over who makes what type of changes and where, tracking of trouble reports, reconstruction of previous versions, management reports, archiving, and all the remaining “steps” to total configuration control.

CCC is interactive and friendly. It supports all programming languages, and comes with on-line tutorials.

Available now! Over 1000 Softool products are installed worldwide.

CCC is supported on the DEC VAX, DG MV, Gould S.E.L., Honeywell 6000 (Level 66 and DPS 8), HP 9000, and IBM 370, 30XX and 43XX computers.

There is more. CCC is a stand-alone component of SOFTOOL®. An integrated Programming Environment (PE™) is also available.

If you want true configuration control, where all components of a given release can be managed as a unit, there is only one choice: CCC.
