This index covers all technical items that appeared in this periodical during 1984. The index is divided into an Author Index and a Subject Index, both arranged alphabetically.

The Author Index contains the primary entry for each item; this entry is listed under the name of the first author and includes coauthor names, title, location of the item, and notice of corrections and comments if any. Cross-references are given from each coauthor name to the name of the corresponding first author. The location of the item is specified by the journal name (abbreviated), year, month, and inclusive pages.

The Subject Index contains several entries for each item, each consisting of a subject heading, modifying phrase(s), first author's name, and enough information to locate the item. For coauthors, title, comments, and corrections if any, etc., it is necessary to refer to the primary entry in the Author Index.

**AUTHOR INDEX**

**A**

Anderson, Peter G. Review of 'Software Engineering with Ada' (Booch, G.; 1983); S-M Jan 84 119

Anderson, Peter G. Review of 'Software Productivity' (Mills, H. D.; 1983); S-M Apr 84 119

**B**

Babu, K. Ramesh. Flexibility without sacrificing rigor; S-M Jul 84 86

Bissell, Stan, and Wiley R. McKinzie. Book reviews; S-M Oct 84 122–127

Boehm, Barry W. Verifying and validating software requirements and design specifications; S-M Jan 84 75–88

**C**

Carter, Tony M., see Organick, Elliott I., S-M Jan 84 31–49

Cheriton, David R. The V kernel: A software base for distributed systems; S-M Apr 84 19–42

Cox, Brad J. Message/object programming: An evolutionary change in programming technology; S-M Jan 84 50–61

Curtis, Ronald, and Larry Wittie. Global naming in distributed systems; S-M Jul 84 76–80

**D**

Davis, Alan L., see Organick, Elliott I., S-M Jan 84 31–49

**E**

Ettlinger, Henry A. Review of 'Software Testing Techniques' (Beizer, B.; 1983); S-M Apr 84 116–117

**F**

Farrow, Rodney. Generating a production compiler from an attribute grammar; S-M Oct 84 77–93

**G**

Goldberg, Adele, and David Robson. Smalltalk-80: The Language and Its Implementation (Reading, MA: Addison-Wesley, 1983); Review by Johnson, G., S-M Jan 84 118–119

**H**

Hayes, Alan B., see Organick, Elliott I., S-M Jan 84 31–49

Hoare, C. A. R. Programming: Sorcery or science?; S-M Apr 84 5–16

**J**

**K**

Klass, Dan, see Organick, Elliott I., S-M Jan 84 31–49

Kruchten, Phillipe, Edmond Schonberg, and Jacob T. Schwartz. Software prototyping using SETL programming language; S-M Oct 84 66–75

**L**

Lampson, Butler W. Hints for computer system design; S-M Jan 84 11–28

Larrabee, Tracy, and Chad Leland Mitchell. Gambit: A prototype approach to video game design; S-M Oct 84 28–38

Lenat, Douglas B., see Davis, Randall

Lenat, Douglas B., Ed., see Hayes-Roth, Frederick, Ed

Lewis, Ted G. On selecting an implementation language: C or Pascal?; S-M Jan 84 98–99

Lewis, Ted G. Word processing for the masses: A review of Bank Street Writer; S-M Apr 84 89–92

Lewis, Ted G., K. R. Spitz, and P. E. McKenney. An interleave principle for demonstrating concurrent programs; S-M Oct 84 54–64
Lindstrom, Gary, see Organick, Elliott I., S-M Jan 84 31-49

M
Maloney, Mike P., see Organick, Elliott I., S-M Jan 84 31-49
Martin, Donald, see Waite, Mitchell.
McCabe, F. G., see Clark, K. L.
McClure, Carma, see Martin, James
McCorduck, Pamela, see Feigenbaum, Edward A.
McKenney, P. E., see Lewis, Ted G., S-M Oct 84 54-64
McKinzie, Wiley R. Review of 'Software Maintenance—The Problem and Its Solution' (Martin, J., and McClure, C.; 1983); S-M Apr 84 118
McKinzie, Wiley R., see Bissell, Stan, S-M Oct 84 122-127
Miles, Dana E. Copyrighting computer software after Apple v. Franklin; S-M Apr 84 86-87
Mills, Harlan D. Software Productivity (Boston: Little, Brown & Co., 1983); Review by Anderson, P. G., S-M Apr 84 119
Mitchell, Chad Leland, see Larrabee, Tracy, S-M Oct 84 28-38

N
Nelson, Brent E., see Organick, Elliott I., S-M Jan 84 31-49

Wittie, Larry, see Curtis, Ronald, S-M Jul 84 76-80

SUBJECT INDEX

A
Architecture; cf. Computer architecture
Artificial intelligence
Artificial intelligence; cf. Expert systems

B
Bibliographies
hints for improving computer system design. Lampson, Butler W., S-M Jan 84 11-28
Book reviews
book review; Smalltalk-80: The Language and Its Implementation
COMMUNICATION SYSTEM SOFTWARE

C

Communication system software
building quality and productivity into software system for the SCESS
switching system. Prell, Edward M., + , S-M Jul 84 47-54

Compilers
generating production compiler from attribute grammar. Farrow,
Rodney, S-M Oct 84 77-93

Computer architecture
hints for improving computer system design. Lampson, Butler W.,
S-M Jan 84 11-28

Computer languages
book review; micro-Prolog: Programming in Logic (Clark, K. L.,
book review: Smalltalk-80: The Language and Its Implementation
118-119
choosing between Pascal and C; comment on software review. Baba,
K. Ramesh, S-M Jul 84 86
FORTH as system development language; ROMable FORTH
applications code development. Payne, W. H., S-M Oct 84
100-103
Gambit, language for video game design using language for prototype
approach. Larrabee, Tracy, + , S-M Oct 84 28-38
selecting implementation language; C versus Pascal. Lewis, Ted G.,
S-M Jan 84 98-99
software prototyping using SETL, programming language.
Krutchen, Phillipe, + , S-M Oct 84 66-75
transforming an Ada program unit to silicon and verifying its
behavior in Ada environment; first experiment. Orgaick,
Elliott L., + , S-M Jan 84 31-49
translating Pascal into C, comment on software review. Peterson,
James L., S-M Jul 84 82-86
Copyright protection
copying problem as related to software; legal protection offered by
patents and copyrights. Task Force on Legal Aspects of
Computer-Based Technology, S-M Apr 84 74-82
copyrighting computer software after Apple vs. Franklin. Miles,
Dana E., S-M Apr 84 84-87

DATABASE SYSTEMS
application of knowledge-based techniques to database management.
Wiederhold, G., S-M Jan 84 63-73

Distributed computing
BugNet, Unix-based global naming system for debugging distributed
software. Curtis, Ronald, + , S-M Jul 84 76-80
dynamic task scheduling in hard real-time distributed systems.
Ramamritham, Krithivasan, +, S-M Jul 84 65-75

+ Check author entry for coauthors
† Check author entry for subsequent corrections/comments

IEEE STANDARDS
benefits of good documentation; review of ANSI/IEEE Std. 829 for
software test documentation. Poston, Robert M., S-M Oct 84
98-99
IEEE software engineering standards; why, how, and by whom they
are developed. Poston, Robert M., S-M Apr 84 94-98

INTEGRATED CIRCUITS
Integrated circuits; cf. Very large scale integration

JAPAN
book review: The Fifth Generation—Artificial Intelligence and
Japan’s Computer Challenge to the World (Feigenbaum, E. A.,
84 108-109

KNOWLEDGE-BASED SYSTEMS; cf. Expert systems

LANGUAGES; cf. Computer languages

LEGAL FACTORS
 copying problem as related to software; legal protection offered by
patents and copyrights. Task Force on Legal Aspects of
Computer-Based Technology, S-M Apr 84 74-82
Legal factors; cf. Copyright protection

MAINTENANCE; cf. Software maintenance

MICROCOMPUTERS

O
Operating systems; cf. Software, operating systems

P
Patents
copying problem as related to software; legal protection offered by
patents and copyrights. Task Force on Legal Aspects of
Computer-Based Technology, S-M Apr 84 74-82
Publishing; cf. Copyright protection
Software
capital-intensive software technology. Wegner, Peter, S-M Jul 84 7-45
copying problem as related to software; legal protection offered by patents and copyrights. Task Force on Legal Aspects of Computer-Based Technology, S-M Apr 74-82
copyrighting computer software after Apple vs. Franklin. Miles, Dana E., S-M Apr 84-87
Software; cf. Communication system software
Software design/development
cedar programming environment; introduction to salient features. Teitelman, Warren, S-M Apr 84 44-73
courseware for software development and computer applications area; review. Bissell, Stan, +, S-M Oct 84 122-127
determining complete set of software standards with cube approach. Poston, Robert M., S-M Jul 84 87-99
FORTH as system development language; ROMABLE FORTH applications code development. Payne, W. H., S-M Oct 84 100-103
importance of basing programming practice on underlying mathematical theories. Hoare, C. A. R., S-M Apr 84 5-16
object-oriented programming style used in Smalltalk-80; tutorial. Cox, Brad J., S-M Jan 84 50-61
software prototyping using SETL, programming language. Kruchten, Phillippe, +, S-M Oct 84 66-75
US&R (Undoo, Ship, and Redo), interactive recovery package for protection from user errors. Vitter, Jeffrey Scott, S-M Oct 84 39-52
Software design/development; cf. Computer languages
Software development management
building quality and productivity into software system for the SS-E system switching. Prell, Edward M., +, S-M Jul 84 47-54
Software maintenance
Software, operating systems
V kernel, software base for distributed systems. Cheriton, David R., S-M Apr 84 19-42
Software reliability
BugNet, Unix-based global naming system for debugging distributed software. Curtis, Ronald, +, S-M Jul 84 76-80
US&R (Undoo, Ship, and Redo), interactive recovery package for protection from user errors. Vitter, Jeffrey Scott, S-M Oct 84 39-52
Software requirements and specifications
reconstruction of requirements specification from program itself and transition to automated testing and maintenance. Sneed, Harry M., S-M Jul 84 56-63
Software requirements/specifications
verifying and validating software requirements and design specifications. Boehm, Barry W., S-M Jan 84 75-88
Software standards
determining complete set of software standards with cube approach. Poston, Robert M., S-M Jul 84 87-89
IEEE software engineering standards; why, how, and by whom they are developed. Poston, Robert M., S-M Apr 84 94-99
need for software standards; standards versus creativity. Poston, Robert M., S-M Jan 84 95-97

Software testing
reconstruction of requirements specification from program itself and transition to automated testing and maintenance. Sneed, Harry M., S-M Jul 84 56-63
Software verification
interleave principle for demonstrating concurrent programs. Lewis, Ted G., +, S-M Oct 84 54-64
Standards; cf. IEEE standards; Software standards
System analysis and design

Testing; cf. Software testing
Text processing
Bank Street Writer word-processing program; review. Lewis, Ted G., S-M Apr 84 89-92

Very large scale integration
transforming an Ada program unit to silicon and verifying its behavior in Ada environment; first experiment. Organick, Elliott I., +, S-M Jan 84 31-49
VLSI, cf. Very large scale integration

Word processing; cf. Text processing
