BUILD A NEW WORLD OF
LARGE REAL-TIME
DISTRIBUTED
SYSTEMS
AT GTE GOVERNMENT SYSTEMS

GTE Government Systems is building its software engineering team to get involved in an entirely new application — to define, develop, integrate, and test software subsystems embedded in real-time, interactive, digital voice processing systems. VAX 8600 clusters, MicroVAX II workstations, and LANs using VMS and UNIX in a distributed architecture provide a state-of-the-art computing resource environment for these cutting-edge projects.

Join us in these efforts in one of the following areas:

- SOFTWARE CONFIGURATION MANAGEMENT
- SOFTWARE SYSTEMS ENGINEERING
- SOFTWARE ANALYSIS
- SOFTWARE ARCHITECTURE
- DATA BASE ENGINEERING
- WORKSTATION DESIGN
- SOFTWARE METHODOLOGY
- SOFTWARE DEVELOPMENT
- SOFTWARE INTEGRATION & TEST

You've never heard of anything like the voice processing systems at GTE Government Systems. Take advantage of this opportunity to play a key role today.

We offer competitive compensation, a professional work environment, and complete benefits, including educational assistance, a stock purchase plan, a tax-deferred savings plan, and much more. To take advantage of these career opportunities, send your resume in complete confidence to:
