By way of thanks...

Many people have given freely of their time and technical talents to referee manuscripts submitted for publication in *IEEE Software*. We are using this forum to publicly acknowledge and thank these referees, listed below and on the following pages, for their efforts on our behalf.

Because all members of the *IEEE Software* Editorial Board have authored papers, we know from experience the time and effort it takes to develop a manuscript. We also know how important a good, detailed review of our work is in improving its overall quality. Therefore, we do not take the refereeing of manuscripts lightly.

A manuscript sent to *IEEE Software* for consideration is typically forwarded to six persons for review. We expect referees to have constructive comments that will help the author:

- correct errors and misconceptions;
- make the article technically consistent and technically complete;
- organize the material in a way that will help the reader understand the issues presented;
- verify the appropriateness, accuracy, and relevancy of conjectures and results;
- use contemporary and relevant references;
- employ better diagrams, tables, graphs, and examples.

If a referee’s report does not cover at least several of these issues for the author, we typically “reject” it and submit the manuscript to additional reviewers, just as we would if the referees gave detailed but conflicting views about a manuscript. We expect there to be a strong consensus for accepting a manuscript.

All of this does, of course, take time. There have been some manuscripts that were in process for over a year (taking into account revisions, which are in the reviewing process as well), but the vast majority of manuscripts complete the process in four to six months. This is certainly an enviable record, considering the refereeing standards we employ and the number of people involved.

If you are interested in assisting with this worthwhile endeavor, please send me your name, address (both physical and electronic), phone number, the subject areas of the Computing Reviews Classification System of the manuscripts to be sent to you, and the number of articles per year you can referee.

Bruce D. Shriver
Editor-in-Chief

### IEEE Software referees

- Timothy Abel, Champlin Petroleum Company
- Daniel Abensour, IBM T.J. Watson Research Center
- Antonio Alban, University of Toronto
- Mack Alford, TRW
- Dennis Allison, Stanford University
- Howard Anawalt, attorney at law
- Wayne Anderson, Los Alamos Scientific Labs
- Gregory Andrews, University of Arizona
- Mark Ardis, Wang Institute of Graduate Studies
- David Athersy, St. Lawrence College
- Motel Azuma, NEC Corporation
- Ted Baker, University of Washington
- Alan Bangs, Asset Consultants
- Mario Barbacci, Carnegie Mellon University
- David Barstow, Schlumberger
- Vic Basili, University of Maryland
- Richard Bernacchi, Irell & Manella
- Philip Berstein, Wang Institute of Graduate Studies
- Mike Blasgen, IBM T.J. Watson Research Center
- Melanie Blower, Internetics, Inc.
- Barry Boehm, TRW Defense Systems Group
- Grady Bouch, Rational
- Taylor Booth, University of Connecticut
- Peter Borgward, University of Minnesota
- William Brantley, IBM T.J. Watson Research Center
- John Breiland, Bell Telephone Labs
- Bob Britcher, IBM T.J. Watson Research Center
John Greene, AT&T Bell Laboratories
Jack Grimes, Intel Corporation
John Guttag, Massachusetts Institute of Technology
Brent Hailpern, IBM T.J. Watson Research Center
Philip Hall, University of Southwestern Louisiana
Jolene Hart, Sperry Univac
George Heidorn, IBM T.J. Watson Research Center
David Heimbold, Stanford University
Tom Hester, Denver Aerospace
George Hettrick, MCC
Christopher Hibber, Xerox PARC
Paul Hilfinger, University of California, Berkeley
C.A.R. Hoare, Oxford University
Lee Hoevel, IBM T.J. Watson Research Center
Jim Horning, Digital Equipment Corporation
Andrew Huber, Data General Corporation
Herman Hughes, Michigan State University
Stephen Hull, Institute of Computer Science
James Inglis, AT&T Bell Laboratories
Steven Jacobs, TRW Defense Systems Group
Karen Jensen, IBM T.J. Watson Research Center
Casper Jones, Nolan, Norton Co.
Warren Jones, University of Alabama, Birmingham
Thomas Kaczmarek, University of Southern California
Gail Kaiser, Carnegie-Mellon University
Yoshiaki Kakuda, Kosusai Denshin Denwa Co.
Elaine Kant, Carnegie-Mellon University
Brian Kernighan, AT&T Bell Laboratories
Ken King, Digital Equipment Corp.
Peter King, consultant, United Kingdom
Allan Klumpp, California Institute of Technology
Verna Knapp, University of Washington
E.B. Koffman, Temple University
H. Kopetz, Technical University of Vienna, Austria
John Kramer, Institute for Defense Analysis
Philippe Kruchten, Telic 7
Mark Laff, IBM T.J. Watson Research Center
Butler Lampson, Digital Equipment Corporation
Steve Landry, University of Southwestern Louisiana
David Landskov, University of Lowell
L.K. Lapsley, AT&T Bell Laboratories
Rudolph Lauber, University of Stuttgart
Duncan Lawrie, Digital Computer Lab
B.M. Leavensworth, IBM T.J. Watson Research Center
Thomas J. LeBlanc, University of Rochester
P.A. Lee, Digital Equipment Corp.
Roy Level, Digital Systems Research Center
Ted Lewis, Oregon State University
T.E. Lindequeist, Virginia Tech
Gary Lindstrom, University of Utah
Cathy Jo Linn, University of Southwestern Louisiana
Joseph Linn, University of Southwestern Louisiana
Barbara Liskov, Massachusetts Institute of Technology
Marc Lobelle, Unite D'Informatique
David Luckham, Stanford University
Stephen Lundstrom, Stanford University
Michael Lutz, Rochester Institute of Technology
Steven Lycke, USAF
Richard Perng-Yi Ma, Aerospace Corporation
Ashok Malhotra, IBM T.J. Watson Research Center
T.A. Marsland, University of Alberta
Edith Martin, Boeing Aerospace Co.
Joanne Martin, IBM T.J. Watson Research Center
Robert Mathis, DOD, Computer Software & Systems
Brian Mayoh, Aarhus University
Diana McAleenan, BTG, Inc.
Bill McKeeman, Wang Institute
Paul McKENNEY, Oregon State University
Wiley McKinzie, Rochester Institute of Technology
Dennis McLeod, University of Southern California
Don Melancon, University of Southwestern Louisiana
Betrand Meyer, University of California
Dana Miles, Riordan, Caps, Carbone & McKinzie
Ed Miller, Software Research Associates
John Musa, AT&T Bell Laboratories
Glen Myers, Intel Corporation
Manfred Nagl, Osnabruck University
J.K. Navlakra, Florida International University
Kathleen Nichols, Oregon State University
Jurg Nievergelt, Eidgenossische technische Hochschule
Anil Nigam, IBM T.J. Watson Research Center
Robert Nimtz, AT&T Bell Laboratories
David Notkin, University of Washington
Mark Ominsky, IBM T.J. Watson Research Center
Dave Parnas, University of Victoria
Burton Pattau, Vericom Systems Ltd.
Yale Patt, San Francisco State University
Judy Peachey, University of Saskatchewan
Abe Peled, IBM T.J. Watson Research Center
Alan Perlis, Yale University
Dewayne Perry, AT&T Bell Laboratories
James Peterson, Carnegie-Mellon University
Udo Pooch, Texas A&M
Gerald Popek, Locus Computing Corporation
Bob Poston, Programming Environments, Inc.
Lawrence Putnam, Quantitative Software Management, Inc.
Bob Rader, IBM T.J. Watson Research Center
Krithi Ramamritham, University of Massachusetts
Juris Reinfelds, University of Wollongong
Greg Riccardi, Florida State University
Linda Rising, Indiana University
John Roach, Virginia Polytechnic Institute & State University
David Rosenblum, Stanford University
Howard Rubin, Hunter College, CUNY
Ralph San Antonio, Dynamics Research Corp.
Behcet Sarikaya, Universite de Sherbrooke
Ed Satterthwaite, Tartan Labs
Brian Schar, US Dept. of Defense
Norman Schneidewind, Naval Post Graduate School
Ed Schonberg, New York University
Jack Schwartz, New York University
Zary Segall, Carnegie-Mellon University
Rebecca Serey, Deloitte, Haskins & Sells
Mary Shaw, Carnegie-Mellon University
There are three ways to subscribe... choose the best one for you.

1. Subscribe at the non-member rate of $90/year.

2. Save by subscribing at the sister society rate. If you are a member of an affiliate society such as ACM, DPMA, or any other professional technical society, you are eligible for a special rate of $25/year. Fill in coupon below and mail with your remittance today.

3. Save even more by joining the IEEE Computer Society and subscribing to IEEE SOFTWARE at the low member rate of $14/year (plus membership dues). Check box and we will send you a brochure that explains membership rates and benefits.

SAVE TIME
Call the Computer Society Membership Department at (714) 821-8380.

We will:
- send you a membership brochure and application by return mail, or
- answer your questions, or
- send you a coupon good for a free book if you join the Society, or
- send you a free copy of Computer Magazine, or
- all of the above
