NOW THERE'S ONLY ONE THING KEEPING YOU FROM PROGRAMMING IN ADA:

YOU.

If you're programming on an Apollo DOMAIN, SUN-2 or SUN-3 system—or considering investing in one—the language of the future is here.

Right now, validated, full-function Ada compilers are available from Alsys, the leader in Ada language systems. Compilers as advanced as Ada itself.

They're written in Ada and self-compiled, which means they meet a standard that goes beyond validation, one imposed by the language itself.

They're efficient, producing fast, compact running code. Code that even surpasses that of many commercial compilers, including some of the best C and Pascal compilers available (according to the Ackerman Benchmarks).

They're supported with documentation that's clear and complete. And by a technical support staff of Ada experts, eager to help you get the most out of your Alsys Ada compiler.

They're available now. Call or write Alsys today for the rest of the story. Because the more you know about our compilers, the sooner you'll be using one.

Alsys, Inc., Dept. IEE 1432 Main Street, Waltham, MA 02154
Telephone: (617) 890-0030 Telex: 948-536
Also offices in France and the United Kingdom.

☐ Please send me more information about your Ada compiler for my __________ (please specify system).

☐ Please send me more information about Ada.
