Software Quality Engineer

AT&T Information Systems Data Networks Division has an immediate opening for a Software Quality Engineer in the Middletown, New Jersey area. The location offers a choice of urban or suburban lifestyles. Salaries and benefits rank among the best in the industry.

The job objective is to improve the quality and productivity in the software development organizations within the Division. This involves development of software quality improvement programs, training and consultation in software engineering methodologies and tools, and assisting developers in identifying and solving software quality problems. This position offers high visibility and an opportunity to be part of a team in implementing a division-wide Total Quality Improvement Program.

A Master or Ph.D. degree in Computer Science with several years of software development or quality management experience is required. In-depth knowledge of software engineering methodologies is also needed. Familiarity with the UNIX® environment and the C language is a plus. The candidate needs good leadership skills as well as good verbal and written communication skills.

Send detailed resume to: B.D. Rimmer, AT&T Information Systems, Room 4M-232, Crawfords Corner Road, Holmdel, NJ 07733

An equal opportunity employer

Robert N. Britcher is a programmer with IBM's Federal Systems Division in Gaithersburg, Maryland. He is interested in the marketing, engineering, and management of software systems and in the science of programming. He has authored papers on software design, software standards, software metrics, and system engineering.

Britcher received a BA in chemistry from Gettysburg College in 1968. He is a member of the IEEE Computer Society.

James J. Craig is a programmer with IBM's Federal Systems Division in Gaithersburg, Maryland. His technical interests include software design methods, the software development process, artificial intelligence, and computer graphics.

Craig received a BS in information and computer science from the Georgia Institute of Technology in 1982. He is a member of the IEEE Computer Society and the ACM.

The authors' address is IBM Federal Systems Division, 22 Firstfield Rd., Gaithersburg, MD 20877.
