Features

7 Pretty Pane Tilings of Pretty Windows
Jason Gait

Certain graphic windows on VDT screens—called pretty windows—are more aesthetically pleasing than arbitrary rectangles. The user interface described here enforces this aesthetic.

15 Tutorial: Unix Document Formatting and Typesetting
Narain Gehani

Unix provides extensive document formatting facilities that have been and continue to be very successful. This article surveys and introduces the Unix document preparation facilities.

25 A Novel Approach to Sequential Simulation
Devendra Kumar

Traditional simulators require events to be executed chronologically. By departing from this basic convention, a new algorithm promises to speed simulation.

34 Software Authorization Systems
Paul A. Suhler, Nader Bagherzadeh, Miroslav Malek, and Neil Iscoe

For every piece of business software sold, at least one illegal copy exists. This article describes and classifies software-protection methods.

42 Implementing Ada Exceptions
Theodore P. Baker and Gregory A. Riccardi

Can exceptions be implemented for Ada without imposing overhead on normal execution? Yes, as long as certain rules are followed.
