An algorithm developed for distributed simulation could also be useful for sequential simulation, and it can suggest a new approach in this environment. We expect similar lessons to be learned in other application areas of parallel computing.

Acknowledgments
I am thankful to Professor M. Gouda for his encouragement, for several fruitful discussions, and comments on earlier drafts of this article. I am also thankful to Professors J. Misra and K.M. Chandy for useful discussions. This work was supported by Air Force Grant AFOSR 81-0205.
