References

Ted Biggerstaff is director of design information at the Microelectronics and Computer Technology Corp. Before joining MCC in 1985, he worked for Boeing and ITT's Advanced Technology Center. His research interests include software engineering, program-synthesis techniques, and knowledge-based approaches to reusability.

Biggerstaff received a PhD in computer science from the University of Washington at Seattle. He wrote the book Systems Software Tools.

Charles Richter is on assignment from Control Data Corp. to the MCC Software Technology Program, where he works in the design information group. His research interests include specification of concurrent programs and application of knowledge-representation techniques to software design.

Richter received a BS in computer science from Purdue University and is pursuing a PhD in computer science at the University of Texas at Austin.

The authors can be contacted at MCC Software Technology Program, 3500 W. Balcones Center Dr., Austin, TX 78759-6509.
