Change Control vs. Change and Configuration Control . . .
There is a big difference!

With Change and Configuration Control (CCC®) from Softool, you will be able to manage individual changes, the relationships between changes, and complete software versions and releases as a unit. You will be in control!

CCC is the standard for automated change and configuration control.

CCC tracks everything: It handles source code, object code, executables, job control, data base components, procedures, documentation, etc. It can reconstruct previous versions on demand. It supports all programming languages.

CCC comes ready to use: It provides you with a turnkey to start productive work immediately. CCC is an integrated system. Other vendors require multiple products to perform only a subset of the functions that CCC handles.

CCC is a proven product: Over 1,500 Softool products are installed worldwide. CCC is supported on:
- DEC VAX (VMS and ULTRIX)
- IBM 370, 30XX and 43XX (MVS/SP, MVS/XA, and VM/CMS)
- Honeywell (GCOS 8)
- DG (AOS/VS)
- Sun Microsystems (UNIX)
- Gould (MPX).
