At GTE Government Systems, you can be among the first to work on major Ada* projects. We will provide both classroom and hands-on training. You will use an advanced set of support tools and our Ada Programmers Support Environment (APSE), working with a range of VAXs from 8800s to Micro-VAXs, PCs, and MACs. You will develop voice/text processing, advanced man-machine interface, computer networking, relational database management, and distributed computer security systems.

SOFTWARE TASK MANAGERS
You will guide the software tasks of planning, staffing, and tracking of major Ada-based software systems and assist in preparing proposals, support studies, and customer meetings. You will also be responsible for 10-20 software engineers, including task identification and work direction.

SOFTWARE ENGINEERS
Opportunities are available at all levels of experience. These positions involve participation in all phases of highly sophisticated, software-intensive projects. Duties will include: requirements analysis and generation, high-level and detailed design and code/unit testing, software and system integration, documentation, and developing concepts for future systems.

You must have a BS in CS, EE, Math or equivalent experience. You should also have at least two years software development experience working on systems such as VAX/VMS using modern programming languages. Ada knowledge is a plus. Experience in DOD applications is desirable.

Specific software applications include:
- Data Communications
- Database Development
- Computer Security
- Software Integration and Test
- VAX Systems Programming
- Ada Training

All positions require the appropriate background to work with the defense or intelligence community.

GTE provides competitive compensation and an excellent benefits package, including educational assistance, a stock purchase plan, a tax-deferred savings plan, and more. For consideration, please submit your resume in confidence to:

GTE GOVERNMENT SYSTEMS CORPORATION
Washington Operations
