Change Control vs. Change and Configuration Control . . .
There is a big difference!

With Change and Configuration Control (CCC®) from Softool, you will be able to manage individual changes, the relationships between changes, and complete software versions and releases as a unit.

You will be in control!

**CCC is the standard for automated change and configuration control.**

**CCC tracks everything:**
It handles source code, object code, executables, job control, data base components, procedures, documentation, etc. It can reconstruct previous versions on demand. It supports all programming languages.

**CCC comes ready to use:**
It provides you with a turnkey to start productive work immediately. CCC is an integrated system. Other vendors require multiple products to perform only a subset of the functions that CCC handles.

**CCC is a proven product:**
Over 1,500 Softool products are installed worldwide. CCC is supported on:
- DEC VAX (VMS and ULTRIX)
- IBM 370, 30XX and 43XX (MVS/SP, MVS/XA, and VM/CMS)
- Honeywell (GCOS 8)
- DG (AOS/VS)
- Sun Microsystems (UNIX)
- Gould (MPX).

Call today for more details, a hands-on demonstration, or for information on the next seminar in your area.
