Change Control vs. Change and Configuration Control . . .
There is a big difference!

With Change and Configuration Control (CCC®) from Softool, you will be able to manage
individual changes, the relationships between changes, and
complete software versions and releases as a unit.
You will be in control!

CCC is the standard for automated change and configuration control.

CCC tracks everything:
It handles source code, object code, executables, job control, data base
components, procedures, documentation, etc. It can reconstruct previous versions
on demand. It supports all programming languages.

CCC comes ready to use:
It provides you with a turnkey to start productive work immediately. CCC is an
integrated system. Other vendors require multiple products to perform only a subset
of the functions that CCC handles.

CCC is a proven product:
Over 1,500 Softool products are installed worldwide. CCC is supported on:
DEC VAX (VMS and ULTRIX) • IBM 370, 30XX and 43XX (MVS/SP, MVS/XA,
and VM/CMS) • Honeywell (GCOS 8) •
DG (AOS/VS) • Sun Microsystems (UNIX) •
Gould (MPX).

Call today for more details, a hands-on demonstration, or for information on
the next seminar in your area.
