2016 4th Intl Conf on Applied Computing and Information Technology/3rd Intl Conf on Computational Science/Intelligence and Applied Informatics/1st Intl Conf on Big Data, Cloud Computing, Data Science & Engineering

ACIT-CSII-BCD 2016

Table of Contents

Message from the ACIT 2016 Conference Chair........................................................................................................vi
Message from the ACIT 2016 Program Chair..................................................................................................................vii
Message from the CSII Conference Chair......................................................................................................................viii
Message from the CSII Program Chair........................................................................................................................ix
Message from the BCD Conference Chair..................................................................................................................x
Message from the BCD Program Chairs.......................................................................................................................xi
ACIT-CSII-BCD 2016 International Program Committee............................................................................................xii
Keynote: Big Data in Society and Its Application Issues in Business Management and Academia by George Wencai Du.........................................................................................................................................................xv

ACIT 2016

Regular Session

GScheduler: Reducing Mobile Device Energy Consumption .................................................................................................1
Liang Peng

Evaluating Software Architecture Evolution Using Performance Simulation .................................................................7
Bixin Li, Li Liao, and Yi Cheng

Security Enhancement of Robust Anonymous Two-Factor Authenticated Key Exchange Scheme for Mobile Client-Server Environment ........................................................................................................14
Jongho Moon, Jiye Kim, Donghoon Lee, and Dongho Won

Dynamic Voltage and Frequency Scaling Enhanced Task Scheduling Technologies toward Green Cloud Computing .....................................................................................................................20
Eiman Aldahari
Research on the Safety Accidents Prediction for Smart Laboratory Based on Statistical Analysis ..........................................................26
   Ruizhi Li, Honghao Gao, Danqi Chu, Kang Zhang, and Huahu Xu

Analyzing Elements of Letters in a Letter Management System ..........................................................32
   Hideaki Ito, Kazuki Miyazato, Kensiro Ishikawa, Tsuyoshi Taki, Junichi Hasegawa, and Kyoko Raita

An XML Representation of the Octgrid for the Rectangular Dissections ........................................38
   Koushi Anzai, Takaaki Goto, Youzou Miyadera, Takeo Yaku, and Ken Yokota

Implementation and Comparison of M2M Protocols for Internet of Things .........................................43
   Priyanka Thota and Yoohwan Kim

Logic Representation: Aristotelian Syllogism by Diagram ................................................................49
   Sabah Al-Fedaghi

Template-Based Code Generation Framework for Data-Driven Software Development .......................55
   Kshitija Shinde and Yu Sun

An Intelligent Approach to Review Filtering and Review Quality Improvement ................................61
   Iain Lee, Yu Sun, and Yuexin (Sophia) Li

Object-Oriented Code Metric-Based Refactoring Opportunities Identification Approaches: Analysis ..................................................................................................................67
   Isong Bassey, Nosipho Dladlu, and Bassey Ele

Special Session 1: Applied Intelligent Systems for Quality of Life

The Development of the Magnetic Measurement System of the Movement Method ............................75
   Hiroshi Kawano and Seiichi Serikawa

Integration of Hand Gesture and Multi Touch Gesture with Glove Type Device ................................81
   Hayato Takahashi and Yuhki Kitazono

Development of Dragonfly-Like Flapping Robot ..................................................................................87
   Takahiro Kizu, Masataka Inoue, Keiichi Yoshino, and Koju Hiraki

Improvement of Full Automatic Fire Extinguish System for Residential Use ..................................93
   Ryo Takeuchi, Kouki Yamaguchi, Hayato Takahashi, Masahiko Hanada, Hiromichi Hanada, Kanya Mizuguchi, Seiichi Serikawa, and Yuhki Kitazono

Special Session 2: Analysis, Evaluation, and Usage of Web Information, System Behaviors, and Human Actions

Estimation of Rates Arriving at the Winning Hands in Multi-Player Games with Imperfect Information ........................................................................................................99
   Kenshi Yoshimura, Teruhisa Hochin, and Hiroki Nomiya

Evaluation of Parallel Multi-Dimensional Indexing System for Big Data Analysis ................................105
   Kazuto Nakanishi, Teruhisa Hochin, and Hiroki Nomiya

Coloring Methods of Characters for Presentation Slides ................................................................111
   Yui Nonomura, Teruhisa Hochin, and Hiroki Nomiya
Improvement of Mutual Retrieval of Visual and Audio Materials Based on Impression ........................................... 117
Yamato Takahashi, Teruhisa Hochin, and Hiroki Nomiya

Effects of Seasons on Impression and Retrieval Requirement of Pictures ................................................................. 123
Manami Tamai, Teruhisa Hochin, and Hiroki Nomiya

A Smart Framework towards Providing Benefits for One and All ................................................................................ 129
Teruhisa Hochin, Hiroki Nomiya, Hitoshi Iima, and Morshed U. Chowdhury

A Trace Partitioning Approach for Memory Efficiency on a Trace Analysis Environment ........................................... 133
Kazuma Kusu, Izuru Kume, and Kenji Hatano

Special Session 3: Software Engineering with Artificial Intelligence

Gsl-dfs: A Lightweight Goal Selection Algorithm Based on a Goal Selection Criterion ................................................. 141
Shin'ichi Sato

GDM-CBDT: A Mathematical Model for Goal Decomposition Based on Case-Based Decision Theory ................................................................. 147
Shin'ichi Sato

Fast Comparison of Software Birthmarks for Detecting the Theft with the Search Engine ........................................... 152
Jun Nakamura and Haruaki Tamada

ROCAT on KATARIBE: Code Visualization for Communities .......................................................................................... 158
Tomohiro Ichinose, Kyohei Uemura, Daiki Tanaka, Hideaki Hata, Hajimu Iida, and Kenichi Matsumoto

Programmer's Electroencephalogram Who Found Implementation Strategy ................................................................. 164
Aiko Yamamoto, Hidetake Uwano, and Yoshiharu Ikutani

Using Software Metrics Thresholds to Predict Fault-Prone Classes in Object-Oriented Software ........................................ 169
Alexandre Boucher and Mourad Badri

Machine Learning for Detecting Pronominal Anaphora Ambiguity in NL Requirements ................................................. 177
Richa Sharma, Nidhi Sharma, and K.K. Biswas

Toward Obliging Bots for Supporting Next Actions .................................................................................................. 183
Akira Inokuchi, Haruaki Tamada, Hideaki Hata, and Masateru Tsunoda

Computer System Design Exploration Using Local Search and Genetic Algorithms .................................................. 189
George Anderson and Tallman Nkgau

An Empirical Evaluation of the Tobit Model on Software Defect Prediction ................................................................. 196
Yukasa Murakami, Masateru Tsunoda, and Koji Toda

Evaluating Multi-Modal Speech Visualization Application for Deaf and Hard of Hearing People ........................................ 202
Yusuke Toba, Shinsuke Matsumoto, Sachio Saiki, Masahide Nakamura, and Tomohito Uchino
CSII 2016

Regular Session
Enhanced Camera Capturing Using Object-Detection-Based Autofocus
on Smartphones ........................................................................................................208
Liang Peng

Behavior-Based Memory Resource Management for Container-Based Virtualization ..................................................213
Gaku Nakagawa and Shuichi Oikawa

Big Streaming Data Buffering Optimization ........................................................................................................218
Abhilash Kancharla, Jongyeop Kim, Noh-Jin Park, and Nohpill Park

A Novel Model of Convention Management Research and Business Process .....................................................224
Tokuro Matsuo, Takanobu Otsuka, Tetsuya Oishi, Rieko Fujita, Takayuki Ito,
Akihisa Sengoku, Shun Shiramatsu, Naoki Fukuta, Katsuhide Fujita, and Hidekazu Iwamoto

Issues with Path Representation in Transition Systems .......................................................................................230
Yi Zheng, Pei He, Chi-Chang Chang, and Yafen Liu

Special Session 1: Applied Intelligent Knowledge Systems for Informatics
Measurement of Ocular Movement Abnormality in Pursuit Eye Movement (PEM)
of Autism Spectrum Children with Disability ........................................................................................................235
Ippei Torii, Kaoruko Ohtani, and Naohiro Ishii

Development of Monitor System for Dry Eye Symptom .........................................................................................241
Emi Aihara, Ippei Torii, and Naohiro Ishii

Increasing Concentration with Neurofeedback ......................................................................................................247
Shunsuke Kawatake, Ippei Torii, and Naohiro Ishii

Development of Communication Tool for Physically Handicapped with Involuntary
Movements by Line-of-Sight Detection ..................................................................................................................253
Takahito Niwa, Ippei Torii, and Naohiro Ishii

Development of Evacuation Guiding System for Earthquake Disaster .....................................................................259
Takahito Niwa, Ippei Torii, and Naohiro Ishii

Effort Estimation for Embedded Software Development Projects by Combining Machine
Learning with Classification ..............................................................................................................................265
Kazunori Iwata, Toyoshiro Nakashima, Yoshiyuki Anan, and Naohiro Ishii

On Pattern Generating Methods for Incremental Learning by Chaotic Neural Network ........................................271
Toshinori Deguchi and Naohiro Ishii

Characterization of Nearest Neighbor Relation Based on Boolean Reasoning
and Convex Cones ...........................................................................................................................................277
Naohiro Ishii, Ippei Torii, Kazunori Iwata, Kazuya Odagiri, and Toyoshiro Nakashima

Concept of the QOS Control Method Based on the Data Mining in the VDACS Scheme
for the Common Use between Plural Organizations ...................................................................................283
Kazuya Odagiri, Shogo Shimizu, and Naohiro Ishii
Asymmetric Neural Networks with Gabor Filters  
Naohiro Ishii, Toshinori Deguchi, Masashi Kawaguchi, and Hiroshi Sasaki  

Functional Evaluation of the Cloud Type Virtual Policy Based Network Management  
Scheme for the Common Use between Plural Organizations  
Kazuya Odagiri, Shogo Shimizu, and Naohiro Ishii  

Special Session 2: Applied Intelligent Knowledge Systems and Reliability  
Problem Solving with Interactive-Theorem Proving - A Case Study  
Shivashish Jaishy, Nobuhiro Ito, and Yoshinobu Kawabe  

On Computer-Assisted Verification of Timed Anonymity of Multi-Agent Systems  
Yoshinobu Kawabe and Nobuhiro Ito  

A 3D Visualization Display System for the RoboCupRescue Simulation Competition  
Masahiro Yamamoto, Nobuhiro Ito, Kazunori Iwata, Tsuyoshi Matsukawa, and Yoshiyuki Kozuoka  

An Evaluation of BAR: Breakdown Agent Replacement Algorithm for SCRAM  
Shivashish Jaishy, Yoshiki Fukushige, Nobuhiro Ito, Kazunori Iwata, and Yoshinobu Kawabe  

Analysis of Influence of Ungated Residential Community on Traffic of Surrounding Roads  
Yuping Li and Cheng Tian  

Influence Effect of International Capital Flow on China's Economic Growth  
Xu Xianhong, Cheng Tian, and Zhang Jinnuo  

Special Session 3: Geospatial Data Integration  
Analysis of Reliability and Validity of Teaching Evaluation Index System  
Tong Wang  

An Improved Dynamic Load-Balancing Model  
Di Liu, Wenqian Shang, Ligu Zhu, and Dongyu Feng  

Contour Extraction and Vectorization Algorithm for Paper-Cut Pattern  
Sun Muzi and Shi Minyong  

The Implementation of Crawling News Page Based on Incremental Web Crawler  
Zejian Shi, Minyong Shi, and Weiguo Lin  

A Users Clustering Algorithm for Group Recommendation  
Chen Zhang, Jing Zhou, and Weifeng Xie  

Recommendation Engine for Online Short Video  
Nan Yang, Sanxing Cao, Yu Liang, and Zhengzheng Liu  

A Music Identification System Based on Audio Fingerprint  
Yong Fan and Shuang Feng  

Research on Evaluation Method of Big Data Storage Utilization  
Yang Xiaoshan, Zhu Ligu, Zhang Qicong, and Feng Dongyu  

Research on a Visualization Interaction Method  
Lu Jiang, Xiaohong Wang, and Ligu Zhu
An Improved Video Recommendations Based on the Hyperlink-Graph Model ...............................................................379
Wenqian Shang, Songtao Shang, Shuchao Feng, and Minyong Shi

Art Exam Scores Analysis and Visualization ..............................................................................................................384
Yakir Wang, Minyong Shi, Chunfang Li, and Weiguo Lin

Application of Fisheye View in Temporal Spiral Visualization ..................................................................................389
Chengcheng Wang, Ligu Zhu, and Di Zhang

CTMC-Based Availability Analysis of Multiple Cluster Systems with Common Mode Failure .........................................394
Zhiguo Hong, Minyong Shi, and Yongbin Wang

DTMC-Based Performance Evaluation of Animation Rendering Node ........................................................................397
Zhiguo Hong, Yongbin Wang, and Minyong Shi

Research on Collaborative Filtering Recommendation Algorithm Based on Mahout .................................................400
Yongchang Wang and Ligu Zhu

Mechanical Analysis of Basketball’s Movement Trajectory after Its Shooting Action ..................................................406
Cheng Tian

Study on Blasting Effect on Tailings Pond ...................................................................................................................409
Yuanyuan Zhang, Haihong Jiang, and Cheng Tian

BCD 2016

Regular Session

A Study of Heuristically-Based Parametric Performance Improvement/Optimization Algorithms for BigData Computing ...............................................................413
Jongyeop Kim, Noh-Jin Park, and Nohpill Park

Fuzzy Multi-Keyword Query on Encrypted Data in the Cloud .........................................................................................419
Xiu-Jin Shi and Sheng-Ping Hu

Research on Data Mining and Electronic Commerce Information Push Application Based on PMML ........................................426
Peipei Wang and Jiulei Jiang

Author Index ..............................................................................................................................................................431
