Message from the General Chairs
ACOMP 2018

The International Conference on Advanced COMPuting and Applications (ACOMP) is an annual, multi-track international forum for academics, engineers, practitioners and research students to exchange their ideas, techniques, methods, and state-of-the-art applications for advanced computing. Initially formed as a scientific venue for high-performance computing & advanced applications, the conference kept expanding and had a pedigree of attracting international and Vietnamese participants who both are interested in advanced topics of computer science & engineering. The first occurrence of ACOMP was dated back to as early as 2007.

The 2018’s edition of the ACOMP conference was brought to the community when newly-emerging computing trends continue to gather pace towards Industry 4.0. The conference welcomes intriguing talks and highly-regarded research in computer science and computer engineering.

ACOMP 2018 was held in the main campus of HCMC University of Technology. Located near the heart of Ho Chi Minh City, the hosting university serves as the leading research and education hub for sciences & engineering in the southern area of Vietnam. Ho Chi Minh City is the largest, most populous and fast-growing city in Vietnam.
